

TECHNICAL STANDARDS & SAFETY AUTHORITY

INSTITUTE OF POWER ENGINEERS ONTARIO AREA

LOCAL 772

Dear Chief Engineer,

As you are aware, there is an alarming shortage of Power Engineers. You may be having trouble finding good 2nd and 3rd Class Engineers for your plant. You can help us help you!

The Ontario Area Institute of Power Engineers, TSSA and the approved Colleges across the province are working together to help deal with the shortage. Many of you have already been helping us by providing students the critical three months of 4th Class qualifying steam time. We have noticed a marked increase in the number of placements we are able to offer and we have you to thank for that! We continue to encourage you to work with the Colleges to provide the most opportunities for students.

If you have not yet been participating by hosting students in your plant, please consider it. Our employers tell us they enjoy mentoring students, helping to bring new people into the industry, and providing an opportunity for students to develop great hands-on skills. If there are roadblocks in your way, give us a call...we can help!

What's in it for you? As a partner, you will play an important role in developing the engineers of the future. There are tax credits available to paid positions from approved co-op programs. Please visit <http://www.fin.gov.on.ca/en/bulletins/ct/pdf/4014.pdf> for more information. WSIB is covered in the event of an unpaid work term, and the Colleges provide liability insurance.

We appreciate your cooperation by sharing this urgent message with your HR and Management teams. The following link has a helpful video produced by TSSA, which clearly explains the challenges ahead should we not be able to replace our aging workforce: <http://www.tssa.org/regulated/operating/Default.aspx>

To assist with providing a student with qualifying steam time, please contact any or all of the contacts listed on the attached College information document.

Thank you,

Mike Adams

Randy J Purves
