

Inspection Data for Elevators

Data Description

Inspection Data for Elevating Devices by Device Number for Last 5 years	
Summary: A list of all inspections performed by TSSA on elevating devices in the last 5 years for current installed elevating devices.	
Data Available	Definition
Originating Service Request Number	System generated number attached to elevating devices relating to the required action.
Inspection Customer	Name of the entity/organization listed on the inspection report. The customer listed on the inspection report is not necessarily the owner of the device. It may be a contractor or another organization.
Elevating Devices Number (Device)	This is a unique system generated number assigned to each elevating device at the time of the initial installation request. This device itself is identified by this number in a variety of ways. This number is unique and not sequential and serves as an index field to other data sets.
Inspection Number	System generated unique number for the inspection. This is the inspection report number printed on the inspection reports.
Inspection Location	Address where the inspection took place. This address is pulled from the Location of the Elevating Device.
Inspection Type	The type of inspection completed. i.e. Periodic Inspection, Unscheduled Inspection, Initial Inspection, Follow-Up Inspection. Definitions can be provided if required.
Inspection Date(s)	The date the inspector conducted the inspection. Some types of inspections may be conducted over a period of several days – range of earliest to latest dates provided.
Inspection Outcome	Inspection Outcome
