	Technical Standards and Safety Authority <b>INSPECTION PROCEDURE</b>	January 13, 2013
	Procedure for Testing Door Separation	Rev. 0

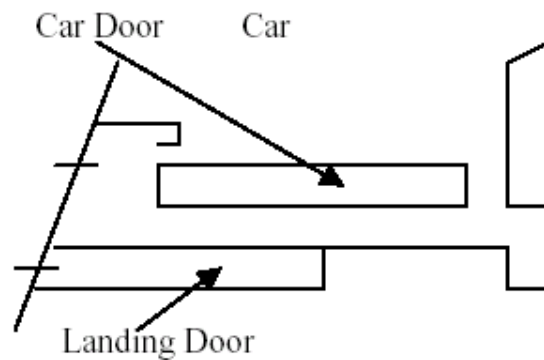

**Procedure:**

1. Both car and landing door to be open.
2. Facing open doors, obstruct the landing door during the second 3rd of closing at the leading edge of the door by stalling the doors as with door pressure verification.
3. As the doors are closing they will come to a controlled stop. If the car door keeps closing, separation has occurred and the following direction shall be issued.

**Required Fix:** Adjust the door closing mechanism to prevent doors from separating when closing @ floor # \_\_ (door clutch).
