

Breakaway Fuels Ltd.
 External Emergency Response Procedures

In accordance with O. Reg 211/01 the following External Emergency Response Procedures are in place at the Breakaway Fuels propane bulk plant regarding response outside the property and to ensure safety for the surrounding public.

In case of a fire or release incident, Breakaway Fuels personnel have been instructed to follow emergency shutdown procedures and evacuate. As soon as the staff have evacuated the area they are to contact emergency services (911) and provide them with the address and details of the incident. When the Georgina Fire Department arrives they will continue the evacuation process of nearby public receptors if deemed necessary by the Fire Department. Breakaway Fuels staff will offer advice and assistance to the emergency responders if requested.

When an emergency is taking place at the facility, the plant manager (or alternate) at the site will be responsible for:

- Ensuring all personnel are accounted for
- Communicating with and assisting emergency responders upon arrival
- Determine if further assistance through activation of ERAC is required

The surrounding public within the hazard distance has previously received notification letters from Breakaway Fuels that informs them that in the event of an emergency they are to adhere to instructions from the local emergency responders for their recommended action and potential evacuation.
